What is the V-180?

The V-180 is an affordable veterinary scale for weighing larger pets up to 180kg in weight. This scale is large, lightweight and has a stainless steel platter.

The scale is simple to use and features a large and bright LCD display to ensure that all users can easily see the weight reading, regardless of which environment they are using the scale in.

Easy to clean

To ensure that longevity of this animal weighing scale, we designed this model to be made of stainless steel construction, meaning it can be cleaned easily.

This means that animals can stand on the scale when they are wet and muddy, with no detrimental effect to the weighing scale and it can be wiped down by the veterinary staff and it is good to go.

Highly portable

We understand that whether the scale is used at home or within a veterinary surgery, it is highly likely that the scale will need to be transported and moved from time to time.

For this reason, the V-180 has been designed to be super lightweight at only 6.2kg and has a carry handle to make transportation easier.
